

AUDITORY SCENE ANALYSIS THE PERCEPTUAL ORGANIZATION OF SOUND

[sound localization wikipedia](#)

Sound localization is a listener's ability to identify the location or origin of a detected sound in direction and distance. It may also refer to the methods in acoustical engineering to simulate the placement of an auditory cue in a virtual 3D space (see binaural recording, wave field synthesis).. The sound localization mechanisms of the mammalian auditory system have been extensively studied.

[gestalt principles scholarpedia](#)

Gestalt principles, or gestalt laws, are rules of the organization of perceptual scenes. When we look at the world, we usually perceive complex scenes composed of many groups of objects on some background, with the objects themselves consisting of parts, which may be composed of smaller parts, etc.

1.. Introduction The official recognition of posttraumatic stress disorder (PTSD) in the DSM-III (American Psychiatric Association, 1980) has prompted what is now a very considerable body of research into the psychology, biology, epidemiology, and treatment of the condition. This growth in knowledge has been accompanied by the development of increasingly sophisticated theories that have ...
