[uncertainty reduction theory wikipedia](#)

The uncertainty reduction theory, also known as initial interaction theory, developed in 1975 by Charles Berger and Richard Calabrese, is a communication theory from the post-positivist tradition. It is one of the only communication theories that specifically looks into the initial interaction between people prior to the actual communication process. The theory asserts the notion that, when ...

[100 influential books every communications major must read](#)

Communication as a field is broad and hard to define, yet communication is undeniably crucial to the human experience. Humanity as a species is constantly looking for faster, more efficient, and better ways to communicate, using written and spoken words, images, video and sound recordings, and any other medium we can think of.
