[insertion sequence wikipedia](#)

Insertion element (also known as an IS, an insertion sequence element, or an IS element) is a short DNA sequence that acts as a simple transposable element. Insertion sequences have two major characteristics: they are small relative to other transposable elements (generally around 700 to 2500 bp in length) and only code for proteins implicated in the transposition activity (they are thus ...

[food safety wikipedia](#)

Food Standards Australia New Zealand requires all food businesses to
implement food safety systems. These systems are designed to ensure
food is safe to consume and halt the increasing incidence of food
poisoning, and they include basic food safety training for at least one
person in each business.

[glucose oxidase an overview sciencedirect](#)

Glucose oxidase (β²-d-glucose:oxygen 1-oxidoreductase; EC 1.1.2.3.4)
catalyzes the oxidation of β²-d-glucose to gluconic acid, by utilizing
molecular oxygen as an electron acceptor with simultaneous production
of hydrogen peroxide. Microbial glucose oxidase is currently receiving
much attention due to its wide applications in chemical, pharmaceutical,
food, beverage, clinical chemistry ...
